## DETAILED ACTION

### *Specification*

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 33, 35, 40 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 6, 13, 21, 30, 38 of U.S. Patent No. 6,570,513. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 33 of the instant application merely broadens the

Art Unit: 2611

scope of the claims 1 of the patent by eliminating the elements and their functions of claims 1 of the patent. Therefore, it would be obvious to one having ordinary skill in the art at the time the invention was made to realize that the both invention to provide an isolated bidirectional communication channel for data signals in a forward direction and in a reverse direction across an isolation barrier comprised of plurality of isolation elements. It has been held that the omission an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA). Also note *Ex parte Rainu*, 168 USPQ 375 (Bd.App.1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art.

Regarding claim 33, Claims 1, 13, 21, and 38 of the Patent recites all the limitations of claim 33 of the instant application.

Regarding claim 34, which inherits the limitations of claim 33, Claims 6, 26, and 34 of the Patent recites all the limitations of claim 34 of the instant application.

Regarding claim 35, which inherits the limitations of claim 33, claim 10, 20, 21, and 38 of the Patent recite all the limitations of claim 35 of the instant application.

Regarding claim 40, claim 20, 21 and 38 of the Patent recites all the limitations of claim 40 of the instant application.

### ***Allowable Subject Matter***

Claims 45 – 90 are allowable over prior art of record.

Claims 36 – 39 and 41 – 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
